Technical requirements for electronic control gears for LED and fluorescent lumninaires (dimmable or non-dimmable) for operation on INOTEC central battery systems (CPS 220 / CPS FUSION) and emergency power supply systems (NEA)

- General requirements -

| Manufacturer: | Type / Description: | |
|-------------------------------|---------------------|--|
| | Luminaire | |
| | EVG: | |
| | LED: | |
| Project / Place / Project ID: | Specified by: | |
| | Name: | |
| | Company: | |
| | Date: | |

| | | Date: | | |
|--|--|--|---|--|
| Features Techn. data / INOTEC requirements | | Explanation | Fullfilled (Yes / No) | |
| 1 | Voltage range AC | 230V ± 10% | Voltage range in normal mains operation | |
| 2 | Voltage range DC | 186V - 260V | Possible voltage range in emergency operation | |
| 3 | Control gear suitable for "Joker-Voltage" ? | B2-rectification of the AC voltage (without smoothing) | Pulsating DC voltage | |
| 4 | Control gear compatible with change- over time of the system? | Change-over time: 150 - 1000ms | Typical change-over time of INOTEC systems between mains- and battery operation | |
| 5 | Starting behavior of the control gear in AC and DC operation | Stable current consumption within 1.6s | Necessary for individual lamp monitoring (SV). The nominal current of the control gear must be reached within this time if the lamp is intact or defective. | |
| 6 | Control gear complies with the standard: (only for fluorescent lamps) | DIN EN 60929 | AC and/or DC-supplied electronic control gear for tubular fluorescent lamps - Performance requirements | |
| 7 | Control gear complies with the standard: (only for fluorescent lamps) | DIN EN 61347-2-3 (incl. Attachment J) | Particular requirements for AC and/or DC supplied electronic control gear for fluorescent lamps | |
| 8 | Control gear complies with the standard: (only for LED) | DIN EN 62384 | DC or AC supplied electronic control gear for LED modules - Performance requirements | |
| 9 | Control gear complies with the standard: (only for LED) | DIN EN 61347-2-13 | Lamp control gear - Part 2-13: Particular requirements for DC or AC supplied electronic control gear for LED modules | |
| 10 | Control gear complies with the standard: | DIN EN 55015 (Measurement on AC and DC) | Limits and methods of measurement of radio interference | |
| 11 | Control gear complies with the standard: | DIN EN 61000-3-2 | Electromagnetic compatibility (EMC) - Part 3-2: Limits - Limits for harmonic current emissions (equipment input current \leq 16 A per phase) | |
| 12 | Control gear complies with the standard: | DIN EN 61547 | Equipment for general lighting purposes — EMC immunity requirements | |
| 13 | Control gear complies with the DALI- standards: | DIN EN 62386-101 /-102 / -207 | The control and status information for monitoring the luminaire is provided via DALI commands. The DALI commands must be 100% compatible. | |

Note: VDE 0108 is not a standard for ECG, marking is not applicable

Technical requirements for electronic control gears for LED and fluorescent lumninaires (dimmable or non-dimmable) for operation on INOTEC central battery systems (CPS 220 / CPS FUSION) and emergency power supply systems (NEA)

 $A/\mu s$

DC detection completely deactivalable?

Max. inrush current of the control gear with connected illuminant

Use of DALI commands according to IEC 62386 part 102:

(for dimmable control gear)

in AC- operation (230V)

To ensure correct operation, the control gear should not react to a change

of the input voltage (DC or "Joker"). In this case, the INOTEC DALI module

luminaires per circuit in order to take account of the maximum contact

load capacity of the circuit changeover circuit or monitoring module.

(DALI-SV module or FMD 230/DALI) controls the control gear.

Control and status information for monitoring the luminaires:

Important for determining the maximum permissible number of
