Technical requirements for electronic control gears for LED and fluorescent lumninaires (dimmable or non-dimmable) for operation on INOTEC central battery systems (CPS 220 / CPS FUSION) and emergency power supply systems (NEA)

- General requirements -

Manufacturer:	Type / Description:	
	Luminaire	
	EVG:	
	LED:	
Project / Place / Project ID:	Specified by:	
	Name:	
	Company:	
	Date:	

		Date:		
Features Techn. data / INOTEC requirements		Explanation	Fullfilled (Yes / No)	
1	Voltage range AC	230V ± 10%	Voltage range in normal mains operation	
2	Voltage range DC	186V - 260V	Possible voltage range in emergency operation	
3	Control gear suitable for "Joker-Voltage" ?	B2-rectification of the AC voltage (without smoothing)	Pulsating DC voltage	
4	Control gear compatible with change- over time of the system?	Change-over time: 150 - 1000ms	Typical change-over time of INOTEC systems between mains- and battery operation	
5	Starting behavior of the control gear in AC and DC operation	Stable current consumption within 1.6s	Necessary for individual lamp monitoring (SV). The nominal current of the control gear must be reached within this time if the lamp is intact or defective.	
6	Control gear complies with the standard: (only for fluorescent lamps)	DIN EN 60929	AC and/or DC-supplied electronic control gear for tubular fluorescent lamps - Performance requirements	
7	Control gear complies with the standard: (only for fluorescent lamps)	DIN EN 61347-2-3 (incl. Attachment J)	Particular requirements for AC and/or DC supplied electronic control gear for fluorescent lamps	
8	Control gear complies with the standard: (only for LED)	DIN EN 62384	DC or AC supplied electronic control gear for LED modules - Performance requirements	
9	Control gear complies with the standard: (only for LED)	DIN EN 61347-2-13	Lamp control gear - Part 2-13: Particular requirements for DC or AC supplied electronic control gear for LED modules	
10	Control gear complies with the standard:	DIN EN 55015 (Measurement on AC and DC)	Limits and methods of measurement of radio interference	
11	Control gear complies with the standard:	DIN EN 61000-3-2	Electromagnetic compatibility (EMC) - Part 3-2: Limits - Limits for harmonic current emissions (equipment input current ≤ 16 A per phase)	
12	Control gear complies with the standard:	DIN EN 61547	Equipment for general lighting purposes — EMC immunity requirements	
13	Control gear complies with the DALI- standards:	DIN EN 62386-101 /-102 / -207	The control and status information for monitoring the luminaire is provided via DALI commands. The DALI commands must be 100% compatible.	

Note: VDE 0108 is not a standard for ECG, marking is not applicable

Technical requirements for electronic control gears for LED and fluorescent lumninaires (dimmable or non-dimmable) for operation on INOTEC central battery systems (CPS 220 / CPS FUSION) and emergency power supply systems (NEA)

 $A/\mu s$

DC detection completely deactivalable?

Max. inrush current of the control gear with connected illuminant

Use of DALI commands according to IEC 62386 part 102:

(for dimmable control gear)

in AC- operation (230V)

18	Current consumption of the control gear without or with defective illuminant in AC- operation (230V)	Selection guide for determination of the monitoring module to recognise a lamp failure correctly.		mA	
19	Dimming level in emergency mode (DC or "Joker") (for dimmable control gear, if activated)	Important for the safety lighting design		%	

	- DPAC (level)	- Direct setting of a dimming valu	e			
	- RECALL MAX LEVEL 0x05	- Set maximum level	- Set maximum level			
22	- RECALL MIN LEVEL 0x06	- Set minimum level	- Set minimum level			
	- QUERY STATUS 0x90	- Requests status telegram	- Requests status telegram			
	- QUERY ACTUAL LEVEL 0xA0	- Requests current dimming value	ي ا			
	- QUERY LAMP FAILURE 0x92	- Requests lamp failure status (af	ter 2 / 2.5 / 3 seconds!)			
	Luminaires, which should work as emergency lighting, have to be in accordance with DIN EN 60598-2-22. (Particular requirements - Luminaires for emergency lighting). Notes:					
For	For the correctness: Martin Hutzl OSRAM DI DS EMA ITM PC - GER2					
Place, Date		Signa	<u>ture</u>			

To ensure correct operation, the control gear should not react to a change

of the input voltage (DC or "Joker"). In this case, the INOTEC DALI module

luminaires per circuit in order to take account of the maximum contact

load capacity of the circuit changeover circuit or monitoring module.

(DALI-SV module or FMD 230/DALI) controls the control gear.

Control and status information for monitoring the luminaires:

Important for determining the maximum permissible number of
