

OT DMX DIM 5CH

12-24-48 V LED DMX dimmer

Benefits

- 5 independent channel outputs
- 12, 24, 48 W DC input
- DMX controls with RDM functionality
- High power handling in slim form factor
- Smooth and fast dimming operation

Applications

Hospitality, museums, shops, residential.
Suitable for indoor CLASS I and CLASS II luminaires.

Approvals

When not printed on product label, they are under evaluation.

Housing material: plastic, white

* image for information purpose only

L	186.2 mm	Total length
B	28.8 mm	Width
H	21 mm	Height
L1	174 mm	Holes interaxis

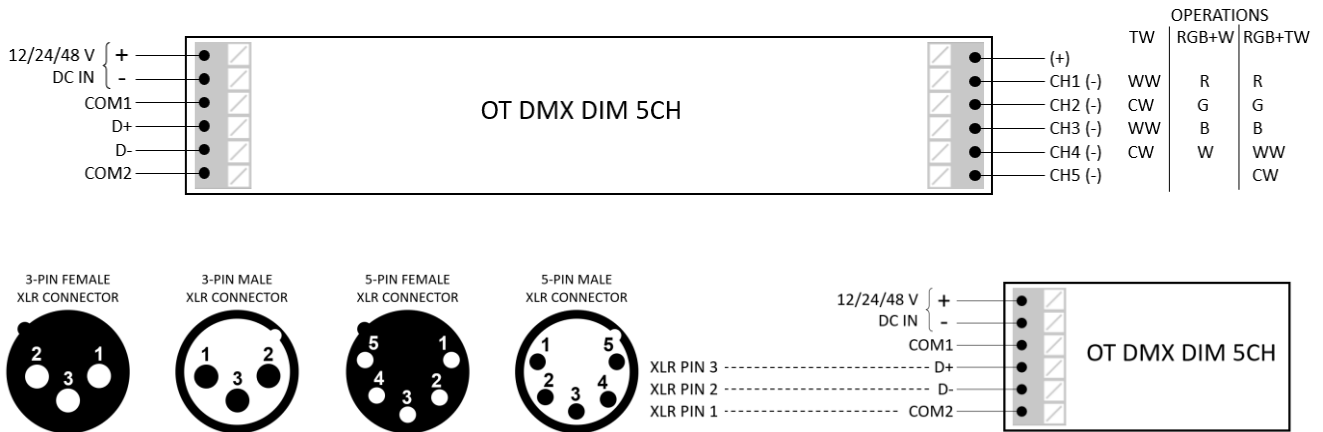

Product Features

- 5 independent channels
- Very small and linear shape
- 5 A/ch max (max 12 A in multichannel)
- 12, 24, 48 V DC input compatible
- Settable PWM dimming frequency
- 50'000 h lifetime at max T_C: 90°C
- 5 years guarantee
- IP20 independent housing (with cable clamps)
- Ambient temperature -10...+50°C

Electrical specifications

	Item	Value	Unit	Remarks
INPUT	Nominal voltage	12 - 24 - 48	V _{DC}	
	Mains frequency	0	Hz	
	Maximum voltage	48	V _{DC}	
	Efficiency in full load	>95	%	At 230 V, 50 Hz – full load
	Networked stand-by power	<0,50	W	
	Protection class	III		
	Suitable for fixtures with prot Class	I / II		
OUTPUT	Nominal output voltage	12 - 24 - 48	V	
	Nominal output power	240 W per channel @48 V 120 W per channel @24 V 60 W per channel @12 V		576 W max @48 V (5 A max per CH) 288 W max total @24 V (5 A max per CH) 144 W max total @12 V (5 A max per CH)
	Galvanic isolation	n/a		
	U-OUT (working voltage)	48	V	
	Dimming interface	DMX512 protocol		With RDM functionality
DIMMING	Dimming range	0 - 1...100	%	
	Dimming method	PWM		
	PWM frequency	307, 667, 1333, 2000, 4000	Hz	Settable via RDM configuration, (lin, exp, quadr. curve)
	Dimming resolution	16	bit	0...255 level
	ENVIRONMENTAL	Ambient temperature range	-10...+50	°C
Max. temperature at T _c test point		90	°C	Measured on T _c point indicated of the prod label, T _a not exceeded
Storage temperature range		-40...+60	°C	
Permitted rel. humidity during operation		5 – 85	%	Not condensing
Environmental rating		Indoor		
IP protection class		IP 20		
ECG lifetime		50000	h	T _c = 80°C %
Intended for no-load operation		No		
Overheating protection		No		Check T _c point on critical installations
Overload protection		No		Available combination with OPTOTRONIC LED drivers
Short-circuit protection		No		Available combination with OPTOTRONIC LED drivers
Type of connection, output side		Push-in terminal		
Length		186.2	mm	
Width		28.8	mm	
Height		21	mm	
Mounting hole spacing, length		174	mm	
Product weight		80	g	
Cable cross-section, input side		0,5...1,5	mm ²	(20...16 AWG) Push-in terminal
Cable cross-section, output side		0,5...1,5	mm ²	(20...16 AWG) Push-in terminal
Wire preparation length, input side		9...10	mm	
Wire preparation length, output side		9...10	mm	
Casing material		Plastic		

Connections

Product follows DMX512+RDM BUS reference standards: ANSI E1.11 and ANSI E1.20

Connecting live parts in the D+, D- and COM terminal, will potentially damage or destroy the device.

Programming

Enter the “DMX START ADDRESS” configuration to program device DMX channels.

The device stores information about operating hours and ON/OFF cycles; this is accessible in the DEVICE STATE menu. Information is read-only.

Within the “LAMP MENU” it is possible to set the status of the outputs when the device is switched ON: “LAMP ON MODE” allows to set if loads have to turn 100% ON or stay OFF. This is only enables in absence of DMX signals.

In the “DIMMER MENU” all dimming settings can be configured. See below for more details in available curves and PWM frequencies.

Following are the RDM commands supported by this device:

REQUESTED PARAMETERS		SUPPORTED PARAMETERS	
DISC_UNIQUE_BRANCH	✓	PRODUCT_DETAIL_ID_LIST	✓
DISC_MUTE	✓	DEVICE_MODEL_DESCRIPTION	✓
DISC_UN_MUTE	✓	MANUFACTURER_LABEL	✓

Personalities are programmable via RDM with following pre-set maps stored in the device:

- 5CH Dimmer (CH1...5) – Factory default setting
- Macro Dimmer (5CH sync - CH1...5)
- Dim-to-Warm (CH1-2, CH3-4)
- Tunable White (CH1-2, CH3-4)
- Smart HSI RGB (CH1...3)
- Smart HSI RGBW (CH1...4)
- Smart HSI RGB+TW (CH1...5)
- RGB (CH1...3)
- RGBW (CH1...4)
- M+RGB+Strobe (CH1...3)
- M+RGBW+Strobe (CH1...4)

Dimming curves can be programmed as following, with different PWM frequencies:

Programmable PWM frequency:

- 307 Hz
- 667 Hz
- 1333 Hz
- 2000 Hz – Factory default setting
- 4000 Hz

Programmable dimming curve:

- Logarithmic – Factory default setting
- Quadratic
- Linear

Dimension

Remarks

- **No load operation:** do not put a switch between OT DMX DIM 5CH and load.
- The product must be installed in a vertical or horizontal position with the label/top cover facing upwards or vertically. Other positions are not permitted.
- Keep 230Vac (LV) circuits and not SELV circuits separated from safety extra low voltage (SELV) circuit and from any connection with this product. It is absolutely forbidden to connect, for any reasons whatsoever, directly or indirectly, the 230Vac mains voltage to the product terminal blocks.
- The product must be dissipated correctly. The use of the product in harsh environments could limit the output power.
- Always ensure proper thermal management (i.e. correct mounting of the device, air flow etc.) so that the T_c point temperature does not exceed the T_c maximum limit. Product has no overheating protection.
- Only use correctly dimensioned SELV power supplies with short circuit, overvoltage and reverse polarity protection.
- In the case of power supplies equipped with ground terminals, it is mandatory to connect ALL protective ground points (PE= Protection Earth) to a properly and certified protection earth.
- The connection cables between the very low voltage power source and the product must be properly dimensioned and must be insulated from any wiring or part at non-SELV voltage. Use double insulated cables.
- Dimension the power of the power supply in relation to the load connected to the device. In case the power supply is oversized compared to the maximum absorbed current, insert a protection against over-current between the power supply and the device. OPTOTRONIC LED power supplies are strongly suggested.
- All devices and control signals connected to the buses (DMX512 or other) must be of SELV type (the connected devices must be SELV or in any case provide a SELV signal).
- Signal cable length must be shorter than 10 m. Recommended load cables length is shorter than 3 m. All cables must be properly dimensioned do avoid voltage drop and must be insulated from any wirings or circuits working at non-SELF voltages nearby. It is recommended to use double insulated cables. For load cables longer than 3 m, installer must guarantee the correct operation of the system. In any case it is not suggested to exceed the length of 30 m.
- **Ecodesign regulation information:**
Intended for use with LED modules only. Separated control gear and light sources must be disposed of at certified disposal companies in accordance with Directive 2012/19/EU (WEEE) in the EU and with Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 in the UK. For this purpose, collection points for recycling centers and take-back systems (CRSO) are available from retailers or private disposal companies, which accept separate control gear and light sources free of charge. In this way, raw materials are conserved and materials are recycled.
