Current selection by DIP-switch¹¹⁾**(B) Installing and operating information (SELV driven):**

Connect only LED load type. LED module will be switched off when output voltage is outside the voltage range given on the driver.

Wiring information (see fig. A):

Do not connect the outputs of two or more units. Output current selection via DIP-switch in mains off/max only. Unit is permanently damaged if mains is applied to the terminals 21-22. Lines 21/22 max. 2 m whole length excl. modules. Please make sure to switch off the driver via L.

Technical support: www.inventronicsglobal.com1) Constant current LED Power Supply; 2) t_c; point; 3) Made in China; 4) picture only for reference, valid print on product; 5) Mains; 6) Input; 7) Output; 8) wire preparation; push in; 9) Year; 10) Week; 11) Current selection by DIP-switch; 12) Cable types (tested acc. to EN 60598-1)**(C) Installations- und Betriebshinweise (SELV Treiber):**

Schließen Sie nur LED-Lasttypen an. Das LED-Modul wird abgeschaltet, wenn sich die Ausgangsspannung außerhalb des auf dem Treiber angegebenen Spannungsbereichs befindet.

Verdrahtungshinweise (siehe Abb. A):

Die Ausgänge von zwei oder mehreren Geräten dürfen nicht verbunden werden. Die Ausgangsstromauswahl erfolgt nur im netzspannungsfreien Zustand durch die DIP-Schalter. Das Gerät wird dauerhaft beschädigt, wenn an die Klemmen 21-22 Netztversorgung angelegt wird. Maximale Gesamtänge der Leitungen 21/22: 2 m ohne Module. Bitte achten Sie darauf, den Treiber über L auszuschalten.

Connecter uniquement un type de charge LED. Le module LED s'éteint lorsque la tension de sortie ne respecte pas la plage de tension mentionnée sur le conducteur.

Informations de câblage (voir fig. A) :

ne pas brancher les fils de sortie de deux unités ou plus. Sélection du courant de sortie via commutateur DIP : coupe impérativement l'alimentation secteur au préalable. Le raccordement secteur aux terminaux 21-22 causera des dommages irréversibles à l'unité. Longueur maximale des lignes 21/22 : 2 m sans modules. Veillez à éteindre le pilote via L.

(I) Informazioni su installazione e funzionamento (Driver SELV):
Collegare solo il tipo di carico LED. Il modulo LED si spegne quando la tensione di uscita è al di fuori dell'intervallo di tensione indicato sul driver.

Informazioni sul cablaggio (vedi figg. A):
Non collegare insieme le uscite di due o più unità. Seleziona corrente in uscita via DIP switch solamente con rete in modalità spenta. L'unità è danneggiata permanentemente se la tensione di rete viene applicata ai terminali 21-22. Linee 21/22 max. 2 m lunghezza intera esclusi moduli. Si prega di disattivare il driver via L.

Supporto tecnico: www.inventronicsglobal.com

1) Alimentazione LED a corrente costante; 2) Punto t_c; 3) Prodotto in Cina; 4) immagine solo come riferimento, stampa valida sul prodotto; 5) Rate; 6) Ingresso; 7) Uscita; 8) cablare; inserire i cavi; 9) Anno; 10) Settimana; 11) Selezione della corrente mediante interruttore DIP; 12) Tipi di cavi (testati ai sensi di EN 60598-1)

(E) Indicaciones de instalación y funcionamiento (Conductor SELV):

Conecte solo los tipos de carga LED. El módulo LED se apaga cuando la tensión de salida está fuera del intervalo de tensión indicado en el driver.

Indicaciones sobre cableado (véase la fig. A):
No conecte a la vez las salidas de dos o más unidades. Ajuste de la corriente de salida mediante el interruptor DIP solo con la red en modo apagado. La unidad permanecerá dañada si la red eléctrica se aplica a las terminales 21-22. Líneas 21/22 max. 2 m de longitud completa sin incluir módulos. No olvide desconectar el conductor mediante L.

Soporte técnico: www.inventronicsglobal.com

(P) Informação de instalação e funcionamento (Driver SELV):

Ligue apenas a LEDs. O desligamento do módulo LED ocorre quando a tensão de saída estiver fora do intervalo de tensão especificada no controlador.

Informação sobre ligação dos cabos (consultar a fig. A):
Não interligue as saídas de duas ou mais unidades. Seleção da corrente de saída via interruptor DIP apenas com a tensão de rede desligada. A unidade será destruída se tensão da rede for aplicada aos terminais 21-22. Comprimento máximo das linhas 21/22: 2 m sem incluir módulos. Certifique-se de desligar o condutor via L.

ICUTRONIC LED Power Supply

(GP) Πληροφορίες εγκατάστασης και χειρισμού (Οδηγός SELV):

Συνδέστε μόνο τύπο φωτισμού LED. Η λινότα ΔLED απενεργοποιείται όταν η τάση εξόδου είναι εκτός των ήρεων τάσης που έχει οριστεί για τον οδηγό.

Πληροφορίες καλύβωσης (BL, εικ. A):

Μην συνδέστε την ηλεκτρική τάση εξόδου μόνο με την περισσότερη μονάδα. Επιλογή ρεύματος εξόδου: Εικόνας DIP σε διατύπωση απενεργοποίησης δικτύου. Η μονάδα ωφελείται πολύ θρύλη εάν οι εκρόβετες 21-22 συνδέθουν με τριφορδούσα ρεύματα. Γραμμές 21/22 - 2 μέτρα μεγ. συνολικό μήκος, χωρίς τις μονάδες. Βεβαίωσετε ότι έχετε απενεργοποιήσει τον οδηγό μετά την.

Τεχνική υποστήριξη: www.inventronicsglobal.com

1) Ηλεκτρική τροφοδοσία συνεχούς ρεύματος με LED; 2) Σημείο δοκιμής t_c; 3) Ξώρα προέλευσης Κίνα; 4) Η εικόνα είναι ενδεικτική. Η έγκριση εκτύπωση είναι στο προϊόν; 5) Δίκτυο; 6) Εισοδος; 7) Εξόδος; 8) Προστασία καλύμβου, ωθήστε; 9) Ετος; 10) Εβδομάδα; 11) Επιλογή ελεκτρικής έντασης με διάκοπη DIP; 12) Τύποι καλύμβου (δοκιμή σύμφωνα με το πρότυπο EN 60598-1)

(NL) Installatie- en gebruiksinstructies (SELV-driever):

Sluit alleen het type voor LED-vermogen aan. De ledmodulen zal worden uitgeschakeld wanneer de uitgangsspanning buiten het spanningssbereik op de driver valt.

Informatie over bedrading (zie fig. A):

Sluit de uitgangstransistor van twee of meer eenheden niet op elkaar aan. Selecteer de uitsgangstransistor via een DIP-switch alleen als de uitspanning uit staat. De eenheid wordt permanent beschadigd als die het stroomhoofd wordt aangeleid op de uitsluitpunt 21-22. Leidringen 21/22 max. 2 m totale lengte excl. modules. Zorg dat de u driver uitschakelt via L.

Teknische ondersteuning: www.inventronicsglobal.com

1) Constante ström LED voeding; 2) t_c-punkt; 3) Geproduceerd in China; 4) afbeelding slechts ter informatie, zie gedig stempel op product; 5) Net; 6) Ingang; 7) Utgång; 8) draadvorberedelse; insteken); 9) Jaar; 10) Week; 11) Stroomsterkelektie via de DIP-schakelaar; 12) Kabeltypes (getest volgens EN 60598-1)

(S) Installations- och bruksinformation (SELV-driever):

Anslut endast läster av LED-typ. LED-modulerna kommer att stängas av när utspänningen är utanför det spänningsintervall som anges på driftrutin.

Inkopplingsinformation (se fig. A):

Koppla inte ihop utgående ledningar från två eller flera enheter. Val av utgående ström endast via DIP-omkopplare med huvudströmmen bortkopplad. Permanentta skador kan uppstå i enheten om huvudströmmen kopplas till terminalerna 21-22. Ledringar 21/22 max. 2 m hel längd exkl. moduler. Vår noga med att slänga av drivhetens via L.

Tekniskt stöd: www.inventronicsglobal.com

1) Konstantström LED-stromforsörjning; 2) t_c-punkt; 3) Geproducerad i Kina; 4) Bild endast avsedd som referens, giltig tryck på produkten; 5) Nätspänning; 6) Ingång; 7) Utgång; 8) kabelförberedelse; stick; 9) År; 10) Vecka; 11) Strömvälg med DIP-switch; 12) Kabeltyper (testade i enl. med EN 60598-1)

(H) Assenue ja käytöntietoja (SELV-ajuri):

Kytke ainastaan led-kuumistustyyppinen LED-moduuli kytkeytti pois pääältä, kun lähtöjännite on ohjaamessa määritetty jännitteen ulkopuolella.

Kytkenäytteen (katso kaavio A):

Älä kytki kahden tai useamman yksilön lähtöjohitoja toisiinsa. Lähtöviran valinta DIP-kytkimellä ainostaan, kun sähköverkko on poissikytkettynä. Yksilö vahingoittuu pystävä, jos kytkentärimäärä 21-22 liittetään sähköverkoon. Linjojen 21 ja 22 kokonaispituuksia enintään 2 m ilman moduleja. Muista kytke ohjaus pois pääältä L:n kautta.

Tekninen tuki: www.inventronicsglobal.com

1) Tasavirralihdu led-moduulleita; 2) t_c-piste; 3) Valmistettu Kiinassa; 4) kuva on vain viitteellinen, tuotteeessä painettu pateva; 5) Verkkojännite; 6) Sisästulot; 7) Ulostulot; 8) johtimen kuorinta; liitos; 9) Vuosi; 10) Viikkö; 11) Virtalaitta DIP-kytkimellä; 12) Kabelityyper (testattu standardin EN 60598-1 mukaisesti)

(N) Installations- og driftsinformasjon (SELV-drivere):

Koble til LED-lasstyret. LED-modulene blir slått av når utgangsspenningen er utenfor spenningsområdet som er angitt på driveren.

Kablingsinformasjon (se fig. A):

Utgangsledninger for to eller flere enheter må ikke kobles sammen. Utgangsstrømmen må kun velges med DIP-bryter når strømmen er slått av. Enheten skades permanent hvis det brukes nettstrøm på terminalene 21-22. Maks. lengde for ledningene 21/22 er 2 meter, ekskludert moduler. Husk å slå av driveren via L.

Teknisk støtte: www.inventronicsglobal.com

1) Konstant ström LED strömforsyring; 2) t_c-punkt; 3) Produsert i Kina; 4) Bilde kun for referanseformål, gyldig påtrykk på produkt; 5) Ledningsnett; 6) Ingang; 7) Utgang; 8) ledningsforberedelse; skyr inn; 9) År; 10) Uke; 11) Stromvalg ved hjelp av DIP-bryter; 12) Kabeltyper (testet i henhold til EN 60598-1)

(DK) Installations- og driftsoplysninger (SELV-drivere):

Tilslut kun LED med lasstyret. LED-modulene slukkes, når utgangsspenningen ligger uden for det spendingsområdet, der er anført på driveren.

Anvisninger for ledningsføring (se fig. A):

Forbind ikke udgangsledningerne fra to eller flere enheder. Udgangsstømmen via DIP-omkodderen må kun vælges ved frakoblet netstrøm. Hvis klemmerne 21-22 tilsluttes netstrøm, beskadiges enheden permanent. Samlet længde på ledningerne 21/22 på maks. 2 m ekskl. moduler. Sørg for at slukke driveren via L.

Teknisk assistance: www.inventronicsglobal.com

(CZ) Informace k instalaci a provozu (Předávák SELV):

Připojte pouze LED žárovku, když je výstupní napětí mimo rozsah napětí uvedeného vodičem.

Informace k zapojení (viz obr. A):

Nespojte výstupní kably žárovek či více jednotek dohromady. Nastavení výstupního proudu prostřednictvím přepínače DIP pouze v režimu vypnutí přívodu energie. Pokud je na konektorech 21-22 připojeno napájení ze sítě, dojde k trvalému poškození jednotky. Max. celková délka kabelů 21/22 bez modulů je 2 m. Nezapomeňte, prosím, zdroj vypnout pomocí L.

Technická podpora: www.inventronicsglobal.com

(RS) Информация по монтажу и использованию (Пускатель БСНН (безопасное сверхнизкое напряжение)):

Подключайте только светогидроидные устройства. Светогидроидный модуль выключится, когда выходное напряжение выйдет за пределы диапазона, указанного на драйвере.

Информация о проводке (см. рис. А):

Не соединяйте выходные провода двух или более устройств. Регулировка выходного тока с помощью DIP-переключателя только в режиме отключенного сетевого питания. Устройство будет повреждено без возможности восстановления, если на клеммы 21-22 подается питание. Линии 21/22 — макс. 2 м общей длины, кроме модулей. Не забывайте выключать драйвер через L.

(PL) Wskazówki dotyczące instalacji i użytkowania (sterownik SELV): Podłączając wyłącznie diodowe źródła światła. Moduł LED zostanie wyłączone, gdy napięcie wyjściowe będzie poza zakresem napięcia podanym na sterowniku.

Wskazówki dotyczące okablowania (przykład rys. A):

Nie łączyć się sobą przewodów wyjściowych dwóch lub większej liczby zasilaczy. Wybór prądu wyjściowego za pomocą przełącznika dwustanowowego dokonywać tylko w trybie wyłączonego napięcia sieciowego. Jeśli napięcie sieciowe zostanie podłączone do zakończeń 21/22, zasilacz zostanie trwale uszkodzony. Calkowita maksymalna długość przewodów 21/22 z wyłączeniem modułów wynosi 2 m. Ustalaj kiedyś należy wyłączyć, używając L.

Wspieracie techniczne: www.inventronicsglobal.com

1) Zasilacz prądu do LED: 2) punkt pomiaru temperatury t_c; 3) Wyprodukowane w Chinach; 4) Obrázek słynuje jako przykładowy, obowiązujący nadruk znajduje się na produkcji; 5) Zasilanie; 6) Wejście; 7) Wyjście; 8) przygotowanie przewodu; naciśnij; 9) Rok; 10) Tydzień; 11) Ustawienie napięcia prądu za pomocą przełącznika typu „DIP-switch”; 12) Rodzaje przewodów (przebadane zgodnie z normą EN 60598-1)

(SK) Informácie o instalácii a prevádzke (Ovládač SELV):

Pripojte iba zástrážne típusu LED. Modul LED sa vypne, keď je výstupné napätie mimo rozsah napätiu uvedenému vodičom.

Informácie o zapojení (vid obr. A):

Nespojte výstupné vodiče dvoch alebo viacerých jednotiek. Výber výstupného prúdu prostredníctvom DIP prepínacia len v režime vypnutého sieťového napájania. Jednotka sa natrvalo poškodí, ak sa na klemky 21-22 privedie sieťové napájanie. Vodiče 21/22 max. 2 m, celá dĺžka okrem modulov. Nezbudzajte výpruhu vyuľadá výrobca prostredníctvom L.

Technická podpora: www.inventronicsglobal.com

1) LED napájecí zdroj s konstantním proudem; 2) bod merania teploty t_c; 3) Vyrobeno v Číně; 4) obrázek jen pro referenci, reálnou polohu se nachází na výrobku; 5) Napájanie; 6) Vstup; 7) Výstup; 8) príprava vodičov; vŕtací; 9) Rok; 10) Týždeň; 11) Výber prúdu pomocou prepínáča DIP; 12) Typy káblů (testované v súlade s EN 60598-1)

(SLO) Informacija o namestitvi in delovanju (Gonilnik SELV):

Priklikujte samo LED vrste vstopno/izhodno. Če pa je izhodna napetost zunaj območja napetosti, navedene na gonilniku, se modul LED izklopiti.

Informacija o ozljediju (glejte sliki A):

Ne povežujte skupaj izhodnih žič dveh ali več enot. Izbor izhodnega toka prek stikalni DIP samo pri izklopljenem omrežjem napajanja. Enota se trajno poškoduje, če se napetost dojavja na terminalne 21-22. Napeljava 21/22 max. 2 m celote dolžine brez modulov. Poskrbite, da boste gonilnik izklopili prek L.

Tehnična podpora: www.inventronicsglobal.com

1) Stanek napajanja LED; 2) senzor temperature; 3) Izdelano na Kitajskem; 4) Slika je samo za参考, veljavjeni natpis je na izdelku; 5) Napajanje; 6) Vhod; 7) Izhod; 8) zicans; pritisnite; 9) Leto; 10) Teden; 11) Izberi tipa s stikalom DIP; 12) Vrste kablov (testirano v skladu z EN 60598-1)

(TR) Kurulum ve işletim bilgisi (SELV sürücüsü):

Sadece LED yıldız türünü bağlayınız. Çökis voltajı sürücüde belirtilen voltaj aralığının dışına çıkmadığında LED modülü kapanır.

Kablo bağlantısı bilgisi (balkontz sklop):

İki veya daha fazla ünitemizdeki kablolardan birbirine bağlanamayın. Çökis akımı düzeneşmesi yalnızca şebekede kablolardan motundan DIP anahtarı aracılığıyla. Ana şebekeler 21-22 bağlantı ucumuna uygulanır. Üstinde kâlıcı olarak hasar görür. Modüller dışında maks. 2 m toplam uzunluğta 21/22 hatları. Sürücüyü L aracılığıyla konuma getirmeye lütfen dikkat edin.

Teknik detaylar: www.inventronicsglobal.com

(RO) Instrucțiuni de montaj și operare (Alimentare SELV):

Conectați numai sursaci tip LED. Modulul LED va fi închis când tensiunea de ieșire este în afara intervalului pentru tensiunea asistată driverului.

Indicații de cablare (vedeți fig. A):

Nu conectați firele de ieșire a două sau mai multe unități la un loc. Selectarea curentului de ieșire prin comutatorul DIP se face numai în modul decuplat de la retea. Unitatea se deteriorează irreversibil dacă se aplică tensiuni de retea la bornele 21-22. Linile 21/22 – max. 2 m lungime totală, exclusiv module. Aveți grijă să opriți driverul prin intermediul L.

(BG) Информация за монтаж и работата (Глуково устройство с безопасно свръхниско напрежение):

Свръхниско само сврътодорни твари. LED модулът ще се изключи, когато изходното напрежение е извън обхвата на напрежението, посочен на контролния модул.

Инструкция за окabelяване (виж фиг. A):

Не свръхниско заедно изходните жици на два или повече модула. Изходният ток се избира чрез DIP превключвател само в режим на изложеното електроизразханение. Модулът ще се изпредаде за постоянно, ако се приложи електроизразханение директно на клеми 21-22. Линии 21/22 макс. 2 m цяла дължина (без модулите). Не забравяйте да изключите драйвера чрез L.
