## ⑥ Installing and operating information:

Connect only LED load type. LED module will be switched off when output voltage is outside the voltage range given on the driver.

### Wiring information (see fig. A):

Do not connect the outputs of two or more units. The DALI interface provides basic insulation against mains. The metal surface on LED driver underside of OTi DALI 40 NFC LP I is double insulated against mains and DALI interface, also the metal surface is SELV basic insulated against LED output. Output current adjustment = via programming software using the DALI interface or via Near Field Communication (NFC) in mains off mode only. For Near Field Communication (NFC) please refer to Tuner4TRONIC at [www.inventronics-light.com](http://www.inventronics-light.com). Unit is permanently damaged if mains is applied to the terminals 21/22. Lines 21/22 max. 2 m whole length excl. modules.

### Emergency Lighting:

This LED power supply complies with EN 61347-2-13 Annex J and is suitable for emergency lighting fixtures according to EN 60598-2-22 except those used in high-risk task areas.

Hereby, Inventronics GmbH declares that the radio equipment types OTi DALI 15 NFC LP I, OTi DALI 25 NFC LP I and OTi DALI 40 NFC LP I are in compliance with Directive 2014/53/EU and the relevant statutory instruments. The full text of the EU declaration of conformity or the UK declaration of conformity is available at the following internet address: [www.inventronics-light.com](http://www.inventronics-light.com)

Frequency range:

13 553 – 13 567 kHz.

Technical support:

[www.inventronics-light.com](http://www.inventronics-light.com)

1) Constant current LED Power Supply. 2) Wire Preparation. Push in. 3) tc point. 4) Made in China. 5) picture only for reference, valid print on product. 6) Mains.

7) Input. 8) Output. 9) Year. 10) Week. 11) Safety note for mounting with metal screw: The distance between the metal screw and the insulated single wires must be at least 2.5 mm. 12) Position. 13) Cable types (tested acc. to EN 60598-1) 14) A or B. 15) one cable. 16) A and B. 17) two cables

## **SRB** Informacije za instalaciju i rad:

Povežite samo LED tip opterećenja. LED modul će se isključiti ako se vrednost izlaznog napona nalazi izvan naponskog opsega zadatog za držače.

Informacije o ožičenju (pogledajte sl. A): Ne povezujejte izlaze dveju ili više jedinica. Interfejs DALI su izolovani od mrežnog priključka. Metalna površina na donjoj strani LED držaće OTI DALI 40 NFC LP I je dovršeno izolovana od mrežnog napona i DALI interfejsa, takođe, metalna površina je SELV osnovno izolovana od LED izlaza. Podešavanje izlazne struje = putem softvera za programiranje pomoću interfejsa DALI ili putem tehnologija bliske komunikacije (NFC) samo u režimu isključenog mrežnog napajanja. Pogledajte Tuner4TRONIC za informacije u vezi sa tehnologijom bliske komunikacije (NFC): [www.inventronics-light.com](http://www.inventronics-light.com) Jedinica je trajno oštećenaako se mrežni napon primeni na terminalu 21/22. Maks. ukupna dužina vodova 21/22 izuzev modula je 2 m.

Pomoćno osvetljenje: Ovo napajanje za LED trake je usaglašeno sa standardom EN 61347-2-13, Dodatak J i pogodno je za instalacije pomoćnog osvetljenja prema standardu EN 60598-2-22, osim za osvetljenje u okruženjima visokog rizika.

Kompanija Inventronics GmbH ovim izjavljuje da je radio oprema vrste OTI DALI 15 NFC LP I, OTI DALI 25 NFC LP I i OTI DALI 40 NFC LP I u skladu sa Direktivom 2014/53/EU. Ceo tekst EU deklaracije o usaglašenosti je dostupan na sledećoj internet adresi: [www.inventronics-light.com](http://www.inventronics-light.com)

Frekventni opseg: 13.553 kHz – 13.567 kHz.

**EEC** **NZ** WARNING: DALI (FELV) control terminals are not safe to touch. Circuits connected to any DALI (FELV) control terminal shall be insulated for the LV supply voltage of the control gear, and any terminals connected to the DALI (FELV) circuit shall be protected against accidental contact. OTI DALI 15 NFC LP I classified as "Do not cover" (see symbol on the right): The independent LED driver can be used where normally flammable materials, including building insulation, are or may be present, but cannot be abutted against any material and cannot be covered in normal use. OTI DALI 25 NFC LP I and OTI DALI 40 NFC LP I classified as "Non IC": The independent LED driver cannot be abutted against or covered by normally flammable materials or used in installations where building insulation or debris is, or may be, present in normal use. No use for residential installations. The minimum clearance distance from the top and sides of the independent LED driver to normally flammable building elements is  $A=B=C=10\text{mm}$ .
