

|  | Requirements for electronic<br>control gears for fluorescent   |   | Version 13                   |  |  |  |
|--|--|---|------------------------------|--|--|--|
| Manufacturer:<br>Inventronics GmbH<br>Parkring 31-33<br>85748 Garching - Germany   | Type / Description:<br>ECG-type: OT 130/220-240/24 P; EAN: 4052<br>Date: 15/11/2024  | Manufacturer<br>information<br>Complies: YES/NO   |                              |  |  |  |
| Specifications:  | CEAG data:   | Explanation:  |                              |  |  |  |
| Control gear suitable for<br>a DC voltage range:   | 186V - 260V DC (for Lead-Battery)  | Possible voltage range of the battery in emergency mode.<br>(Not for AT-S <sup>+</sup> Systems required)  | Yes                          |  |  |  |
| Control gear compatible with the<br>switch-over time of the system?  | Switch-over time:<br>180 ms - 450 ms   | Typical switch-over time of CEAG systems between<br>mains supply and emergency power supply   | Yes                          |  |  |  |
| Starting behavior of the control gear:   | Stable current consumption after less than 1.6 sec. maximum.   | A stable operation of the control gear after 1.6 seconds of start<br>up is required for the right functionality of the individual<br>monitoring. With max. 20 luminaires for one current circuit:<br>$\Delta$ I in sum < 250 mA are allowed   | Yes                          |  |  |  |
| Control gear compatible with CEAG STAR-Technology:   | Phase-cut telegram (PAT):<br>max. 30 phases (half waves) with max. 60°<br>phase-cuts   | During the CEAG STAR switching process, up to 30 half-<br>waves are cut at a maximum of 60°. The control gear must not<br>exhibit any malfunctions such as switching off, flickering  | Yes                          |  |  |  |
| only for flourescent lamps:<br>Control gear complies with the<br>standard:   | DIN EN 60929   | AC and/or DC-supplied electronic control gear for tubular<br>fluorescent lamps - Performance requirements   | Not Relevant                 |  |  |  |
| only for flourescent lamps:<br>Control gear complies with the<br>standard:   | DIN EN 61347-2-3 (incl. Attachment J)  | Particular requirements for AC and/or DC supplied electronic control gear for fluorescent lamps   | Not Relevant                 |  |  |  |
| only for LED:<br>Control gear complies with the<br>standard:   | DIN EN 62384   | AC or DC supplied electronic control gear for LED modules -<br>Performance requirements   | Yes                          |  |  |  |
| only for LED:<br>Control gear complies with the<br>standard:   | DIN EN 61347-2-13  | Particular requirements for AC or DC supplied<br>electronic control gear for LED modules  | Yes                          |  |  |  |
| Control gear complies with the standard:   | DIN EN 55015<br>(Measured in AC and DC)  | Limits and methods of measurement of radio disturbance<br>characteristics of electrical lighting and similar equipment  | Yes                          |  |  |  |
| Control gear complies with<br>he standard:   | DIN EN 61000-3-2   | Electromagnetic compatibility (EMC) -<br>Part 3-2: Limits - Limits for harmonic current emissions<br>(equipment input current ≤ 16 A per phase)   | Yes                          |  |  |  |
| Control gear complies with the standard:   | DIN EN 61000-3-2, Pkt. 7.3 a.)   | see *Important note!  | Yes                          |  |  |  |
| Control gear complies with the standard:   | DIN EN 61547   | Equipment for general lighting purposes -<br>EMC immunity requirements  | Yes                          |  |  |  |
| Note: The labeling "according to VDE 0108" is n  | ot meaningful, because this is not a control gear standard!  | ·   |                              |  |  |  |
| Specifications:  | CEAG data:   | Explanation:  | Manufacturer<br>information: |  |  |  |
| Important for functiontest:<br>Voltage-dependent<br>Input current of the control gear<br>ncl. LED<br>n DC and AC operation:                          | V-CG-S2: >9,4 mA or >12,7 mA = OK<br>V-CG-S: >16 mA or >47 mA = OK<br>V-CG-SE: >16 mA or >47 mA = OK<br>V-CG-SUW: >47 mA = OK<br>CG-K: >16 mA or >47 mA = OK   | Minimum current of the LED driver with LED module to GOOD detection via the monitoring module.<br>In the voltage range of 189 - 264V AC on AT-S+ or 186 - 260V DC on ZB-S/LP-STAR the input current must be higher than the specified current values.<br>see *Important note!         | see table                    |  |  |  |
| mportant for functiontest:<br>Voltage-dependent<br>No-load current of the control gear<br>without or defect LED module)<br>n DC and AC - operation*: | V-CG-S2: <5,8 mA or <7,9 mA = n.OK<br>V-CG-S: <10 mA or <28 mA = n.OK<br>V-CG-SE: <10 mA or <28 mA = n.OK<br>V-CG-SEW: <28 mA = n.OK<br>CG-K: <10 mA or <28 mA = n.OK  | Maximal current of the LED driver with LED module for<br>BAD detection via the monitoring module.<br>In the voltage range of 189 - 264V AC on AT-S+ or<br>186 - 260V DC on ZB-S/LP-STAR the input current must be<br>lower than the specified current values.<br>see *Important note! | see table                    |  |  |  |
| mportant for the power consumption<br>of addressable ballast:  | V-CG-S2 = 30 A<br>V-CG-S = 30 A<br>V-CG-SE = 30 A<br>V-CG-SUW = 80 A<br>CG-K = 30 A  | The max. inrush current of each monitoring module has to be considered!   | 60A/550us                    |  |  |  |
| Note: Important for the planning -   |  |   |                              |  |  |  |
| Important for the contact load SKU:<br>Max. inrush current of each luminaire<br>n AC operation   | Max. permitted inrush current         per circuit:         SKU 2 x 3A (CG) $\Rightarrow$ 120 A         SKU 1 x 6A (CG) $\Rightarrow$ 180 A         SKU 4 x 1,5A CG-S $\Rightarrow$ 60 A         SKU 2 x 3A CG-S $\Rightarrow$ 250 A         SKU 1 x 6A CG-S $\Rightarrow$ 250 A         SOU CG-S // S <sup>+</sup> $\Rightarrow$ 250 A         SU S <sup>+</sup> $\Rightarrow$ 250 A | The declaration of the inrush current of the luminaire above is important, to calculate the max. possible luminaires on one circuit, to consider the max. contact load limitation of th circuit.  |                              |  |  |  |
|  | Luminaires for emergency lightin   | g must comply with DIN EN 60598-2-22  |                              |  |  |  |
| the current consum   | * <u>Impo</u><br>systems (ZB-S / LP-STAR) with active prelimi<br>ption must be sinusoidal, t.m. all control gea<br>See DIN EN 6  | uminaires for emergency lighting)<br><u>ortant note!</u><br>inary time for AC about 300 seconds (EOL detection of T5 la<br>irs (<25W as well) must have an active PFC (Power Factor Co<br>1000-3-2, Pkt. 7.3 a.)<br>is valid for the complete system (e.g. ZB-S), not possible for    | individual circuits.         |  |  |  |

l

## Notes

1. Control of DALI-SV-Module to the DALI driver is 100% done via DALI-commands according to IEC 62386-101/-102, so the DALI driver must sign with the DALI logo.

2. For calculation the inrush current of the monitoring module must be considered!

3. Not to be used in high risk areas, special release required

4. The light input level is locked in DC-operation. Factory setting is 15% of the maximum level. It is possible to change the behavior of the controlgear in DC-operation.

5. Only 1 DALI- Driver DT8 (1 address/2 channels) or DT6 (1 address/1 channel) to wire with one Dali-SV-Module oniy 1 address possible with one Dali-SV-Module.

## **Remarks:**

1.) This table shows the currents consumption of the driver at three different operating points (Pmax, Pmid, Pmin) for AC and DC operation.

2.) This table is intended for rough design desicions . It is not a replacement for individual functional measurments!

## **Inventronics GmbH**
