

Challenges Municipal Teams Face

Municipal lighting management today goes far beyond simple illumination. Cities must balance financial pressure, safety expectations and regulatory demands, all while ensuring flexibility for evolving urban needs.

-  **Budget Constraints**
Only affordable solutions
-  **Safety requirements**
Reliable night lighting
-  **Energy optimization**
Needs-based lighting control
-  **Event flexibility**
Quick adjustments

Why Municipalities choose Ready2Go

-  **Built for small installations**
One system, many locations
-  **Presence-based lighting**
Safer spaces, lower energy use
-  **Quick seasonal adjustments**
Update settings with just a few taps
-  **Local, secure control**
No cloud. Full privacy. No subscriptions.
-  **Simple app operation**
No IT expertise needed

That's why municipalities choose Ready2Go: local control, total simplicity, peace of mind.

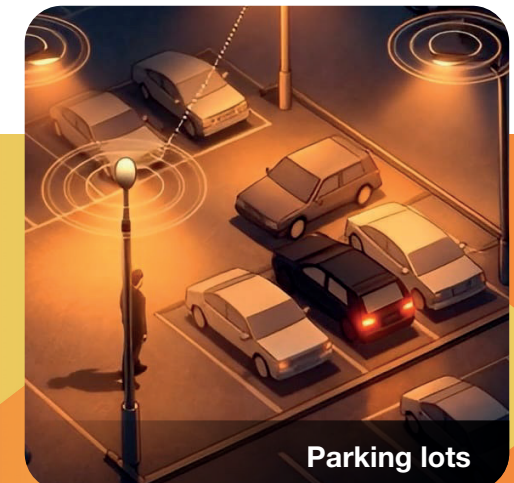

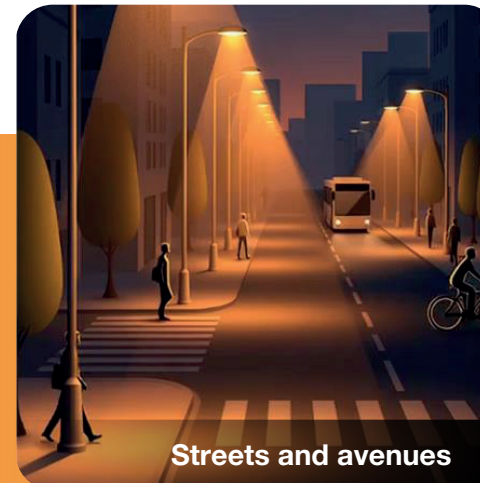

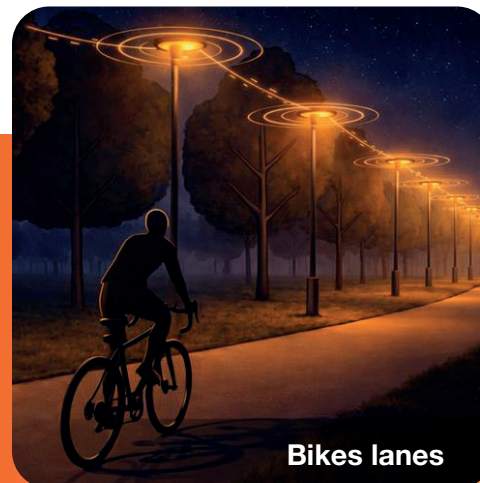

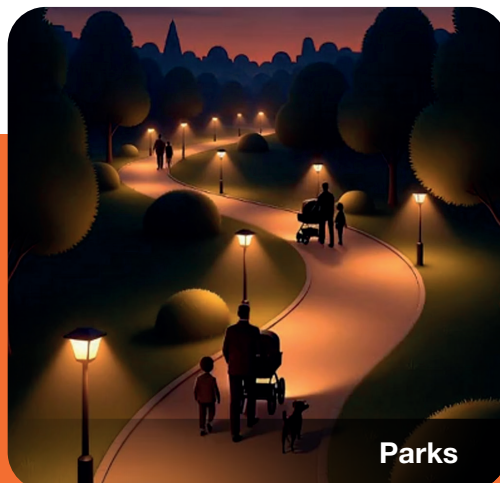

What Ready2Go enables

Ready2Go enables wireless control of outdoor lighting areas, with lights responding to presence to improve safety and efficiency. Different light colors and easy seasonal adjustments adapt lighting to different needs, while local and offline operation ensures secure and cloud-free control.

Complementing Ready2Go: Field Service Tools

The **T4T Field App** supports targeted service on individual luminaires. It enables configuration changes, maintenance operations and diagnostics directly on site via built-in wireless, helping technicians resolve issues quickly and efficiently.

Applications:

Our Apps Options

Ready2Go App

- Manage luminaire groups and networks
- Configure external sensors
- Requires Ready2Go IP66 nodes & ZD4i luminaires

T4T Field-App

- Control individual luminaires
- Perform adjustments & maintenance via built-in wireless
- Requires Ready2Go-inside luminaires

Ready2Go: Easy Safe and Secure

Ready2Go is built for municipalities that want simplicity without compromise.

Certified Bluetooth cybersecurity

Local-only control helps you managing projects without any cloud or IT infrastructures.

ZD4i luminaire compatibility on the roadmap
